

Freestanding

Digital Tyre Inflator with Retractable Hoses

FRP

The FRP model features retractable hoses, and user-friendly controls.

Its futuristic shape and ergonomic design blends with any corporate image. With the optional in-built compressor, air is supplied directly from the pump. As no pressure vessel is needed, inspection and certification costs are therefore eliminated.

The FRP model is the ultimate self-contained tyre inflation solution.

Corporate and Customised Designs Available

Innovative Award Winning Design

Weatherproof

Optional In-built Compressor

Heavy Duty Hose Reels

Piezo Switches for Reliability

International Approvals

Application

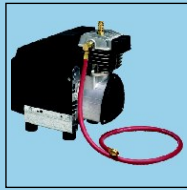

Petrol Station

The world's largest range of digital tyre inflation equipment

Options - Factory Fitted

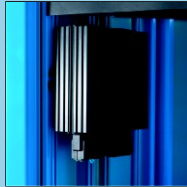

Air Compressor
- Oil Free with Auto Start/Stop

EZ-Coil Controlled Retraction Reel

Water Faucet with Retractable
Hose and Inlet Fittings

Cabinet Heater

Air Filter / Auto-Drain / Regulator

Coin Acceptor Kit

Accessories - Supplied Separately

Installation Bolt Kit - Set of 3

Technical Specifications

Construction

Heavy Duty, Extruded Corrosion Proof
Aluminium Enclosure

Degree of Protection

IP44

Power Requirement

12V AC/DC
100-120V AC 50/60Hz
220-240V AC 50/60Hz

Units of Measurement

psi / kPa / bar / kg/cm²

LCD Types

1 - psi / kPa / bar
2 - psi / kg/cm² / kPa

Operating Range

External Compressor (Not Supplied)
5-145psi / 35-1000kPa / 0.3-10.0bar / 0.4-10.2kg/cm²
Factory Fitted Compressor
5-116psi / 35-800kPa / 0.3-8.0bar / 0.4-8.1kg/cm²

Accuracy + or -

0.3psi / 2kPa / 0.02bar / 0.02kg/cm²

Operating Temperature

Without heater
0°C to +60°C [32°F to 140°F]
With heater
-20°C to +60°C [-4°F to 140°F]
